

The Fluid Science range is an innovative suite of products designed to enable students to gain an understanding of the fundamentals of Fluid Mechanics and Thermo Fluids by the process of learning via hands-on experimentation.

The high precision elements are supplied as modular tray-based systems which operate in conjunction with the Fluid Science service unit, multifunctional work panel and instrumentation enabling the student to conduct their own individual or group experiments.

The experiments are supplied with a highly visual user-friendly operational guide, allowing the students to understand the theory of the subject by the application of practical experimentation.

The Fluid Science Inclined Manometer tray includes experiments to measure small pressure differences and the effect of change in manometer inclination.

COST EFFECTIVE MOBILE TEACHING SYSTEM DESIGNED TO INTRODUCE THE BASICS OF MANOMETRY

Inclined Manometer Tray FS-2.1

Back plates is easily stored inside the unit

Configurable as hot or cold water supply

Highly visual and easy to read scales

Description

The Fluid Science Inclined Manometer tray includes experiments to measure small pressure differences and the effect of change in manometer inclination.

The tray additionally includes a stepped manometer that incorporates changes in cross section to demonstrate that the level of a free surface is not affected by the size or the shape of the tube.

Requirements

Scale

Electrical supply:

- ▶ 100-240V/1 Phase, 50-60Hz
- ▶ Level surface
- ▶ FS experiment trays

Initial fill of 5ltrs water. Drain to empty water away once experiment is complete. During use, water supply or drainage are not required.

Technical specifications

- ▶ Screen printed scale for measuring water height in manometer tubes
- ▶ Tube structure acrylic
- ▶ Plain vertical tube and inclined tube: 6mm ID
- ▶ Stepped tube goes: 6mm ID to 14mm ID to 6mm ID
- ▶ Angle of inclination: 15° from vertical.

FS Series: Heat transfer and manometers products

Overall dimensions

Dimensions tray

Length	0.43m
Width	0.312m
Height	0.080m

Dimensions set up (excluding power supply)

Length	0.385m
Width	0.314m
Height	0.387m

Packed and crated shipping specifications

Net weight	2.0Kg
Gross weight	TBC

Experimental content

- ▶ To demonstrate the behaviour of liquid at rest – a liquid with a free surface finds its own level
- ▶ To show that the free surface of a liquid is horizontal and independent of cross section or inclination of the container
- ▶ Variation of pressure demonstration with varying flow rates against atmospheric pressure
- ▶ Effect of change in manometer inclination

Features

- ▶ Fully mobile solution
- ▶ Each service unit can be used as either a hot or cold-water supply
- ▶ Quick connect couplings for easy connection to experiment modules, self-sealing on supply unit to minimise water loss
- ▶ Digital manometer and thermometer provided with service unit
- ▶ Low voltage within the supply unit to protect users

Benefits

- ▶ Applied student learning via experimentation
- ▶ Common service unit can be used for either hot or cold-water supply
- ▶ Toolless assembly
- ▶ Designed to be highly visual and simple to use
- ▶ Quick setup
- ▶ Suitable for both classroom, laboratory and mobile environments
